

# RhinoGlide<sup>®</sup>

is a quick setting drywall joint filler for finishing, patching and bedding.

## Features

**Smooth**  
Finish

**Superior Aesthetic**  
and Design

**Environmentally**  
Friendly

# RhinoGlide®

Smooth setting  
joint filler

**RhinoGlide® is a quick-setting drywall joint filler for finishing, patching and bedding.**

Complete the jointing on drywall jobs within one day. RhinoGlide® is packed in 10 kg, 20 kg bags and has a setting time of approximately 60 minutes.

## Mixing and Finishing

- 460 ml of water for every 1 kg of RhinoGlide® plaster.
- Roof, windows and doors should be installed before using RhinoGlide® plaster.
- Should not be used in areas washed with hose pipes, in showers or industrial-type kitchens.
- After RhinoGlide® has dried, decoration should follow with minimum delay.

## Application

It is important to observe appropriate health and safety legislation when working on site, i.e. personal protective equipment. RhinoGlide® has been designed as a joint filler for plasterboard systems, an interior crack filler and for filling rough plaster surfaces before painting.

## Handling and Storage

Appropriate personal protection should be used. Store in cool, clean and dry conditions, off the ground and above 5°C. RhinoGlide® Plaster has a shelf life of 6 months.

## Packaging Material

| Material Code | Sales Packaging      |
|---------------|----------------------|
| 20217         | 20 kg 40 bags/pallet |
| 20218         | 10 kg 80 bags/pallet |

## Product Benefits

- Designed as a joint filler for plasterboard systems.
- Smooth joint finish before skimming application

## Physical and Chemical Properties

| Colour    | Mixing Ratio   | Solubility      | pH                    |
|-----------|----------------|-----------------|-----------------------|
| Off White | 1 kg to 460 ml | Slight          | 7.5 to 8.5 approx.    |
|           |                | +/- 2,4 g/liter | When mixed with water |
